CHAIN ACTUATOR

OPENING STROKE SIZES

400, 500 or 600 mm (programmable)

PUSH FORCE

500 N

VOLTAGE

24V DC (+/- 10%)

DESCRIPTION

Designed for surface mounting. For comfort ventilation. To be used with all window types. To be used together with $\pm 24V$ control units or control units with MotorLink®. Can be used together with espagnolette WMB. Synchronization of up to four window actuators – no need for an external synchronization module. Genuine position feedback and three speeds when using control unit with MotorLink®. Soft close function. The electronics in this actuator can be programmed to suit specific requirements – i.e. pressure- and traction force, stroke, speed/sound level – with the WAT 100 programming box, also possible to do after installation. Built-in electronic load switch-off/end stop. Electronic actuator with micro controller. The actuator has an integrated reverse function to ensure a prolonged life span of the window gaskets. Easy mounting

ACTUATOR VARIANTS

The actuator is available in four different versions: single actuator (-1), double actuator (-2), triple actuator (-3) and quad actuator (-4). The synchro actuators (-2, -3 and -4) are equipped with a patented synchronization function, in which the actuators communicate directly with each other, which ensures the actuators operate at exactly the same speed and position. On large windows up to four actuators can be mounted on the same window – with no need for an external synchronization module.
